Congratulations Car Collector,

Way to go *Car Collector*! Your July issue looked great, especially the article about the 1921 Rolls-Royce Silver Ghost Runabout. I own a '74 Rolls Royce and enjoyed seeing where my collector car had its roots started. The engine pictured on page 30 is one of the cleanest and shiniest '20s model I've ever seen. I also enjoyed the article about the 1937 Pontiac Convertible Sedan. My family used to pile in our Pontiac Convertible on Sundays and cruise along the river-side. Keep up the good work.

Thanks Savell

One of your best monthly articles has to be Lawrence Savell's "Old Cars In Law." I was especially interested in the August column "Picks Of The Litter," regarding a car lot full of antique cars that were turning to junk. I own nine collectible cars that are worth a lot of money because I don't let "young saplings grow up between the cars." Even though the owner had a chance to clean up his act, the collectibles turned into a nuisance and had to be removed.

Arne Stream

Dear Editor,

I especially enjoyed the article "An Extra Lively '66 Galaxie" in your March issue. My dad bought one of these cars brand new, then passed it on to me when I was 16. I managed to hold on to the car for seven years, before giving in to the new car bug when I graduated from college. The only repairs needed were a new starter and one water pump. Hopefully I can find one worth restoring someday.

Thanks for the memories.
